for each industrv bv subtracting from the gross shipments the value of
coal shipments to
preparation plants and the resale value of coal purchased for resale
without preparation.
Similarly, the service industries gross receipts were adjusted to a net
basis bv excluding
purchases for resale. Net shipments and receipts for the coal
industries were as follows:
For all Coal Mining, \$2.273 million; for Anthracite, \$157 million; for
Bituminous coal,
\$2,063 million; and Lignite, \$14 million.

This report presents in table 1 comparative general statistics for all
coal mining indus-
tries combined for the census years 1840-1963. Table 2A presents
general statistics bv
industrv for the United States and for geographic areas. Table 2B
presents some cost,
capital, and product details for the coal mining industries for selected
geographic areas.
Table 2C shows number of establishments, employment, and value
added in mining bv
major types of operation for the same geographic areas. In table 3,
detailed statistics are
shown bv industrv for the United States. Table 4 shows selected
statistics for establish-
ments classified bv employment size for all coal mining and separately
for Major Groups
11 and 12. It also includes the number of coal mining establishments
bv employment size
and geographic area.
